1). TRD-J-RZ Series

Sample model: TRD-J240-RZ

The same circuit is used for all types of the TRD-J-RZ series, although disk varies with encoder resolution.

2). Applicability

The following tests were not carried out and the reason is described as bellow.

a. Electromagnetic compatibility- Generic immunity standard

Part 1 : Residential ,commercial and light industry EN50081-2

This test is not carried out, because no noise sources such as oscillating and switch circuit exist in TRD-J-RZ encoders.

b. EN61000-6-2:1999 / Electrostatic discharge EN61000-4-2

This test is not carried out, because no operation switches and buttons will be touched by hands.

c. Low Voltage Directive 73/23/EEC

EN61010-1 (1993)

Because TRD-J-RZ encoder are designed with supply voltage under TRD-J-RZ : 30V DC the requirement of 75V DC or more is beyond application.
